

High quality solution that removes the inconvenience and cost of replacement keys

Multiple Applications

The lock can be set so that a new user can enter a new 4 digit code for each use or it can be set to have one code that is issued to the person that will use that locker all of the time.

If the code is forgotten a 6 digit master code can be used to open the door.

Can be used on doors up to 19mm thick.

These locks can be fitted retrospectively to most locker doors that currently have a standard CAM Lock.

Wireless

Long life battery operated with no wires or software.

Over 15,000 cycles with 9v battery.

Emergency access possible via control panel.

Durable

Can be used in wet areas and in extreme temperatures (-18 to +55 degrees Celsius)
